

We are searching:

Apprentice mechanic trainee (m/f/d)

Your tasks:

Industrial mechanics are employed in the production, maintenance and monitoring of technical systems. You are involved in setting up, retooling and commissioning of production systems. Typical areas of work in a company are maintenance, machine and system building, production technology and fine equipment construction. Some of the different and varied contents you will learn during the 3.5-year apprenticeship are:

- Turning, milling and filing
- Building machine parts
- Monitoring of technical equipment
- Carry out repairs

Your profile:

- Secondary or secondary modern school diploma with good grades in mathematics and physics
- Distinct fine motor skills and a good spatial imagination
- Ability to work in a team and willingness to perform

We are offering:

- A secure apprenticeship with a one-year takeover guarantee in case of good performance on theory and practice
- An attractive training allowance
- An interesting and varied task in a highly motivated team and responsibility right from the start
- Exciting participation in projects
- Further development opportunities beyond apprenticeship
