

To strengthen our team we are looking for a

## **Project leader/Project manager (m/f/d)**

### **Your tasks:**

- Ensuring the economical, technical, qualitative and timely success of the projects, taking into account customer-specific requirements, standards and other specifications
- Extensive project responsibility with structuring, process planning, implementation, control, documentation and controlling in close cooperation with KAM, suppliers and the specialist departments
- Technical leadership of a cross-departmental project team (mechanical and electrical design, purchasing, assembly, PLC programming)
- Coordinated reporting of the project status with the stakeholders
- Occasional national and international travel to customers and suppliers (approx. 30%)

### **Your professional profile:**

- Completed studies in engineering or industrial engineering, alternatively a comparable technical education with relevant professional and project experience
- Experience in special machine construction (project planning, development, planning, production, procurement, assembly, commissioning and acceptance/handover)
- Very good and broad technical understanding
- Knowledge in project management
- Good to very good knowledge of English, both written and spoken

### **Your personality:**

- High degree of reliability, commitment, flexibility, resilience and dedication
- Good communication skills at all levels internally and externally
- Ability to work in a team and assertiveness
- Autonomous, structured and conceptual working style
- Hands-on, pragmatic, solution oriented
