

To strengthen our team, we are looking for:

## **Project manager (m/f/d)**

### **Your tasks:**

- Ensuring the economic, technical, qualitative and timely success of the projects, taking into account customer-specific requirements, standards and other specifications
- Comprehensive project responsibility with structuring process planning, implementation, management, documentation and controlling in close cooperation with KAM, suppliers and the specialist departments
- Coordination and organization of cross-departmental project teams (mechanical and electrical design, purchasing, assembly, PLC programming)
- Coordinated reporting of the project status with the stakeholders
- Occasional national and international trips to customers and suppliers

### **Your professional profile:**

- Completed degree in engineering or industrial engineering, alternatively a comparable technical education with relevant professional and project experience
- Experience in special machine construction (project planning, development, planning, production, procurement, assembly, commissioning, and acceptance/handover) desirable
- Very good and broad technical understanding
- Knowledge of project management
- Good to very good knowledge of spoken and written English

### **Your personality:**

- High level of reliability, commitment, flexibility, resilience and commitment
- Good communication skills at all levels internally and externally
- Ability to work in a team and assertiveness
- Independent, structured and conceptual work
- Hands-on, pragmatic, solution-oriented
